

A JAYASREE

Vijayawada, Andhra Pradesh | 8919431299 | adhikarijayasree5@gmail.com

SUMMARY

Computer Science student with a growing interest in Data Science and analytics. Skilled in programming and logical thinking, with a willingness to learn and adapt to new technologies. Enjoys solving problems and exploring data-driven solutions. Continuously working on improving technical skills and gaining practical experience through projects and coursework.

SKILLS

- Java
 - Python (Intermediate)
 - Object-Oriented Programming
 - Data Structures and Algorithms
 - Data warehousing & data mining
 - Computer Networks
 - Foundations of Data Analytics
 - Machine Learning
 - Operating Systems
 - Software Engineering
-

EDUCATION

Bachelor of Technology: Computer Science and Engineering	2022 - 2026
VIT-AP University - Amaravati, Andhra Pradesh	
GPA: 8.93	
Higher Secondary Degree	2020 - 2022
Narayana Junior College - Srinivasa Manga Puram, Tirupati	
GPA: 95.4%	
Primary and Secondary Education	March 2020
Camford English Medium High School - Ganganapalli, Chittoor	
GPA: 10/10	

PROJECTS

Credit Card Fraud Detection: Using data analysis and Machine learning

Worked on identifying fraudulent transactions using data analysis and detailed Exploratory Data Analysis (EDA). Applied and compared models like Logistic Regression, Decision Tree, Random Forest, KNN, RNN, and SVM, focusing on improving accuracy and evaluation metrics.

Emphasizing the Explainability and Interpretability in Boosting Machine Learning Models

Collaborated as part of a team to predict student performance using CatBoost, EBM, and XGBoost. Contributed equally to data analysis, model tuning with Bayesian Optimization, evaluation using accuracy, precision, recall, and applying SHAP for feature interpretability.

PUBLICATIONS

[1] Co-authored a research paper titled "*Credit Card Fraud Detection: Machine Learning and Data Analytical Approach for Accuracy and Comparative Analysis*" presented at IEEE ICSCNA 2025. Focused on data analysis, Exploratory Data Analysis (EDA), and implementing Logistic

Regression, Decision Tree, Random Forest, KNN, RNN, and SVM for fraud detection with performance evaluation.
